DISTRIBUTOR OF PREMIUM BRANDS

ABOUT DISTINCTIVE BRANDS

At Distinctive Brands, we import, distribute and market premium quality products and brands to our clients in Southern Africa. Our portfolio ranges from fine imported stemware to quality wines. Our range of quality crystal stemware is perfect for use in your home, winery, restaurant or hotel.

WHY USE QUALITY CRYSTAL STEMWARE?

Winemakers, experts and connoisseurs from all over the world emphasise the importance of serving wine in the correct stemware. A good glass should have the following qualities to ensure that the wine is presented in the best possible manner:

- Big bowls invite you to gently swirl the wine,
- The light weight of crystalline ensures a snug fit in your hand,
- Transparent, brilliant glass shows the natural colouration of the wine,
- Thin walls will ensure that the sensitive tip of the tongue tastes the temperature of the wine - and not the glass,
- Long stems invite you to hold the glass by the stem and not the bowl, thus the warmth of your hand does not change the wine's temperature,
- An elegant design is key to an overall luxurious drinking experience.

The high quality of ingredients make crystal products more durable, dishwasher safe, better break resistance and also more brilliant than other glasses made with cheaper glass compositions. Crystal (also referred to as crystalline) glass contains at least 10% Metal oxides, 15% Alkali oxides, 5% Lime and 70% top quality sands. Elements like Potassium enhance light refraction and transparency and make the glass more brilliant.

Zinc stands for chemical durability and finally dishwasher safety. High quality sand lets glasses shine transparently and clear. Pure sand that contains only very little iron avoids greenish or other colored effects in the glass. High quality raw material components increase production costs and are one of the reasons why Crystal glasses are more highly priced than normal glass. However, despite this the qualitative advantages of Crystal glasses are clear.

SPIEGELAU

Spiegelau Crystal is located in the small town of Spiegelau in the heart of the Bavarian Forest. This internationally acclaimed brand has become synonymous with the highest quality in fine glasses. Spiegelau offers a range of glasses for use at home and in the hospitality industry.

RASTAL

RASTAL was founded in Germany in 1919 and is market leader in designing and decorated drinking glasses for all segments and sells 60 million decorated glasses. Rastal is also one of the worlds biggest suppliers of branded beer and spirit glasses and has branches in Poland, Italy, and Switzerland. Rastal stemware is robust and offers elegant shapes.

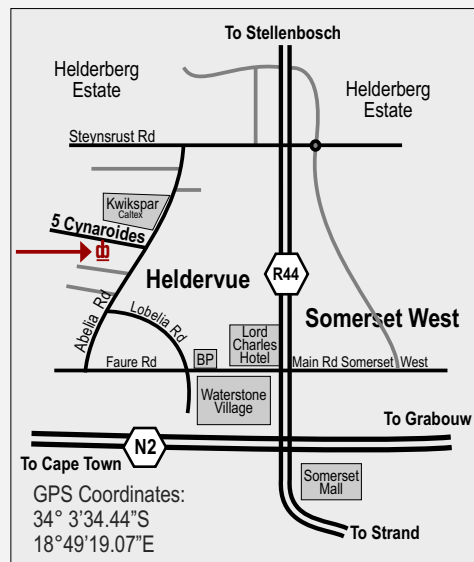

AMRIS

AMRIS Stemware is our house-brand of crystal glasses sourced from our principles around the world. The brand promises good quality at reasonable prices. The range includes most basic shapes and styles that are essential for every day use in the home, boardroom, winery, restaurant and hotel. These glasses are robust and dishwasher safe.
